Objectives

The investment objective of this Fund is to generate long term capital growth for investors, primarily by investing long in European equities.

The Fund primarily aims to gain investment exposure to European equities. The Fund aims to achieve its objective by investing long (seeking to profit from an increase in the price of a security).

The Fund may also invest up to 10% of its net asset value in debt securities which may include government and corporate bonds and notes (fixed and floating rate) and commercial paper which may be rated either above or below investment grade (a rating of BBB or above by Standards & Poor's or another internationally recognised credit agency).

The Fund may also invest in securities with equity characteristics issued by companies in the European Union and the United Kingdom.

Derivatives (instruments whose value depends on the rise and fall of other assets) may be used to achieve the investment objective and reduce risk or manage the Fund more effectively. Derivatives being invested in may include: swaps (including equity, interest rate, currency, credit default, index, total return swaps or swaptions), options, futures, foreign exchange contracts, convertible bonds and warrants. The type of instruments and a description of the purpose for which they may be used is set out in Appendix IV of the Prospectus. Short positions may only be achieved through the use of derivatives.

The Fund may also invest in ancillary liquid assets and may retain amounts in cash or cash equivalents if considered appropriate to the investment objective or for defensive purposes.

The Fund is actively managed and not constrained by any benchmark index. However, the MSCI Europe TR EUR Index is used solely for the purposes of comparing the performance of the Fund. More information on this product's sustainability factors can be found in the prospectus or at www.swmitchellcapital.com. For full investment objective and policy details, please refer to the supplement.

The Fund may utilise techniques and instruments, such as futures, options, swaps, repurchase and reverse repurchase agreements, stocklending arrangements and forward currency contracts, for efficient portfolio management in order to reduce risk and/or costs and/or to generate additional income for the Fund.

Any income less expenses earned by the Fund will not be distributed to investors but will be retained within the assets of the Fund.
